The St Raphael Hospital Project

Rural Western Uganda

The future St Raphael Teaching Hospital will be a state-of-the-art 124-bed facility that will do more than practice medicine. It will create it as we train doctors to become specialists in Pediatrics, Surgery, Internal Medicine, and Obstetrics/Gynecology. The arrival of doctors and specialists, diagnostic and medical equipment, and advanced pharmaceuticals will bring 21st century medicine to this needy region.

In Phase 1, the St Raphael Children Medical and Wellness Center will be built on 100 acres of premium land with direct access to the freeways and donated by the Hoima Catholic Diocese, a project initiator and partner. It is designed to function on its own and will bring young patients unparalleled expertise, leading-edge treatments, and the finest evidence-based care in the region. Only an academic setting can deliver superior outcomes, the like of which this region needs.

St Raphael Hospital Project

Our Mission and Core Values

The health care system in the Kibaale region is seriously lacking. Modern medical care can be found in the capital of Kampala, but rarely in the rest of Uganda. Common illnesses are treated locally, but for the most part, surgical services are unavailable. When complications arise, sick children are referred to Kampala several hours away. Forty percent of illnesses do not get recognized timely for they lack diagnostic equipment and laboratory testing. Children often live with untreated conditions since traveling to Kampala for care is beyond their reach.

The planned St Raphael Teaching Hospital, starting with the pediatric facilities, will improve medical infrastructure,attract essential medical staff to the region, offer better medical treatment, and increase life expectancy.

Our core values based on Christian concern for the disadvantaged, compassion in service, and respect for human dignity inherent in all phases of development**, reflect the concept of a Mission Hospital**. St Raphael will focus on providing high quality, innovative, and affordable health care with emphasis on maternal and child health, and a strong commitment to wellness and disease prevention, supported by research and training. We endeavor to practice medicine within a Catholic Christian ethical framework.

These Kibaale children and others in the region need specialized medical care right where they live.

The planned St Raphael Children Medical and Wellness Center features three floors of the most advanced medical care in the region.

- 41-bed facility including ambulatory, medical, surgical, and ICU services
- Diagnostic center equipped with comprehensive laboratory testing, x-rays, ultrasound, EKG, EEG, and CT-Scan
- Family- centered care approach
- Convenient retail pharmacy
- Oxygen and blood bank availability
- Teaching environment where medical interns acquire pediatric knowledge and medical residents train to become specialists
- Tele-Medicine to access specialized care from advanced institutions

Most importantly, the St Raphael Children and Wellness Center will work seamlessly with other health facilities to ensure that pediatric patients have immediate access to the clinical care they need.
