The New Abortion Landscape P.1

The New Abortion ...cont. P.2

Report from Uganda P.3

St Raphael Hospital Project P.3

Articles in this issue are from our President, Louise Allard.

She has written a book about her experiences in Africa: SURRENDER and Discover the Abundant Life. Available on Amazon.com

The New Abortion Landscape

The abortion industry has changed its stripes. It uses a different strategy to promote universal access to abortion in all circumstances, regardless of the laws in place in different countries [1].

The old system of providing abortion via surgical means is being replaced gradually by the abortion pill [2]. Chemical means are now used in 63% of all abortions, a 50% increase since 2020 [3]. Surgical abortions had too many drawbacks. For the past many years, the ultrasound exposed the humanity of the preborn child. Young people are more reluctant to use abortion and became more pro-life than previous generations.

The abortion Pill (s) is now the method of choice. Abortion has become a private matter, confined to the comfort of one's home. Gone are the operating room presided over by the doctor and his staff [4], the terrifying sound of the suction machine and the tools of the trade.

Instead, we have a young woman in a fetal position, in pain, and suffering from abdominal cramps which started soon after she ingested the pills, Mifepristone and misoprostol, or misoprostol alone. She had ordered them on line and had received the discreet package through the mail without a doctor's exam.

Many young women are terrified of seeing the embryo and dealing with the blood which can be profuse during the process. Because of the ease of access, some will be aborting a baby several weeks older than the 10-week recommended limit [5], thereby increasing their risk of infection and hemorrhage. As for the growing baby, the outcome is always deadly (cont. p.2).

These young people are at risk for abortion!

Praise God, they attended our Sexual Integrity Education Program

Abortion in the 21st Century promotes abortion as autonomy, but in practice, women are abandoned to face the risk, the pain, and the consequences alone

If the woman experiences any complications, and there will be for at least eleven percent of them [6], she will be told to go to the nearest emergency room.

The abortion business is making huge profits through this new paradigm: selling drugs on line while holding the public health care system accountable for addressing bad outcomes [7]. A genius move.

This is "Abortion in the 21st century. The new paradigm promotes abortion as autonomy, but in practice women are abandoned to face the risk, the pain, and the consequences alone [8]."

These are not the only risks that women are exposed to because of the ease in getting deadly drugs through the mail. For example, a recent article recounts: Louisiana Dad Poisons His Daughter with Abortion Drug in Latest Mifepristone Horror Story [9].

The 17-year-old was seven months pregnant when she ended up delivering a one-pound baby after her relative drugged her. Miraculously, the baby survived this attempt on his life [10].

Pills are easy to obtain, and given without in-person consultation and proof of identity [11]. How can this drug have been authorized for so late during pregnancy? The FDA is complicit as they are enabling this type of abuse toward pregnant women and their preborn children [12]. It is the role of government to protect human life in all its stages but instead, we have cooperation with evil.

This contradicts the Trump administration's exceptionally life-affirming position at the UN [13].

For example, countries that receive foreign aid from the US must report annually on the "mutilation of children." This includes abortion as well as transgender drugs and surgeries on minors [14]. This is a step in the right direction and it gives us hope that innocent babies will be protected at home as well.

Report from Uganda

First of all, we hope you enjoy the newer version of LifeWatch. We reformulated our Vision and Mission to make them more specific and pertinent to the work we have already been doing for the last 28 years. You can find them on the last page.

The Pregnancy Resource Center continues to support pregnant women and single mothers in need of encouragement.

Celebration Bakery and Training Center remains active and always adapting to the changing market. We just received new bread bags. It will facilitate packing, be more cost effective, and improve our identity in the market place.

The school we are servicing has doubled their demand for baking products. That's an answer to prayer. Thank you for standing with us.

For this coming month, we will be welcoming Grace, an expert baker and chef. He will come weekly to assess our operations and make recommendations.

In addition, Grace will work with the bakers, develop new or better products, and teach them how to achieve consistency in baking while using our gas oven, our alternate appliance.

St Raphael Hospital Project

Great news! We just received our certification for the Environmental and Social Impact Assessment. In the next few weeks, we will be studying its recommendations with our consultant and determine a plan of action for implementation.

We continue to seek significant funding to begin construction of the pediatric facilities.

As you know, most foundations require personal recommendations. We have such an opportunity in progress. Our Lord is at work. His Word to us: "I know your works. Behold, I have left an open door before you, which no one can close. You have limited strength, and yet you have kept My word and have not denied My name (Rev 3:8)."

Alliance for Life International is a 501c3 educational and charitable organization based in the US. and having the status of NGO in Uganda. Our EIN: 33-0819422

Our Vision: Healthy mothers and children and stronger families

Our Mission: To promote human life in all its stages, improve maternal and child health, strengthen the natural family, and support responsible parenthood

Executive Board

Louise Allard, RN, MA in International Human Rights, President

Dennis Rasmussen, JD, Secretary

Sergio Stone, MD, OB/GYN, Treasurer
